

TASKI® swingo® 150 E

Ultra compact 14-inch (33-cm) upright auto scrubber

The swingo 150E is an ultra-compact, 14 inch upright auto scrubber featuring a lightweight, compact design perfect for quick and easy cleanup in confined areas.

Features & Benefits

- The new gravity fed auto scrubber automatically powers off when the tank is full, preventing moisture from contacting the vacuum motor and prolonging the life of the machine.
- With a functional design similar to conventional upright vacuums, this machine requires limited training and is simple to use.
- A 1,700 rpm brush speed and brush pressure ten times higher than manual cleaning efforts ensures the best cleaning results.
- The industry leading suction unit results in perfectly dry floors in both directions; cleaned areas can be used immediately and safety is improved by reducing the risk of slip-fall accidents.
- The auto scrubber is easy to store and will fit in small spaces; the comfortable handle and lightweight design makes it easy to lift, transport or move in any direction.
- The unique low height brush deck allows this machine easy access under furniture.

Applications

- The machine can be used in restaurants, kitchen areas, service stations or shops where conventional auto scrubbers are simply too heavy and manual cleaning methods do not deliver the required hygienic results.
- Ideal for small, confined spaces like bathrooms.

TASKI® swingo® 150 E

Ultra compact 14-inch (33-cm) upright auto scrubber

Description of Features

- **Integrated tank:** Both the solution and recovery tank are integrated in one unique container. The removable tank can be quickly lifted off for draining or refilling. Due to its wide opening, the tank can be easily cleaned. The tank includes a dosing aid for correct solution dosing.
- **Sustainable solutions:** Compared to bucket cleaning, the TASKI swingo 150 E machine needs 50 percent less water and chemicals.
- **For professional use:** The TASKI swingo 150 E machine is designed for reliable operation. The chassis, made of high impact ABS, is durable and strong.
- **Easy maintenance:** The brush can be changed without tools quickly and easily to reduce downtime and service costs.

Technical data
